

# Reducing Carbon Footprint

By using recycled plastics, we reduce the manufacturing of virgin plastics, leading to **lower water** and **energy consumption** as well as **waste reduction**. This helps decrease our **carbon footprint** and **contributes** to a greener world.

## Contributing to a greener world by using 100% recycled plastic

This is an OxyCYCLE PVCr card, the first smart card made of 100% recycled PVC. OxyCYCLE PVCr cards are qualified by all major payment schemes. While being easily recyclable, this eco-friendly card offers an alternative to standard PVC cards with the advantage of using 100% non-virgin plastics, thus eliminating raw material production and resulting in lower water consumption, as well as reduced energy use and emissions. Due to the excellent thermoplastic nature of recycled PVC, it can be heated and molded or extruded to form new products without any loss of technical performance.

## Key Benefits

- ✓ 100% Recycled Material\*
- ✓ 100% Recyclable\*
- ✓ Less Chemical Usage
- ✓ Less Water Consumption
- ✓ Energy Saving and Emission Reduction

- ✓ Advanced Technologies
- ✓ Light and Durable Material
- ✓ Excellent Mechanical Properties
- ✓ Innovative Design Features
- ✓ Customizable Cards

- ✓ Secure Card Manufacturing in our Cutting-edge Facilities
- ✓ Reliable Quality Control
- ✓ Own Quality Assurance Laboratory

- ✓ Project Consulting
- ✓ In-House Card Design
- ✓ Customized Fulfillment Options
- ✓ Secure Logistics
