

# ENHANCED COVER FOR **PASSPORTS**

## High Design and High Security for Passport Covers

The TOPPAN Security Enhanced Cover is the most advanced and design-forward cover option available for our award-winning custom passport solutions.

### Security and elegance in future passport design

Many passports covers are limited to a single foil embossed design.

With Enhanced Covers, in addition to the full suite of security embedded within the passport's datapage and interior pages,

the cover becomes a primary opportunity to present a beautiful, secure first impression that cannot be duplicated.

Enhanced Covers bring together multicolor foiling and UV printing with emboss and deboss detail on both the front and back cover.

#### Key Benefits

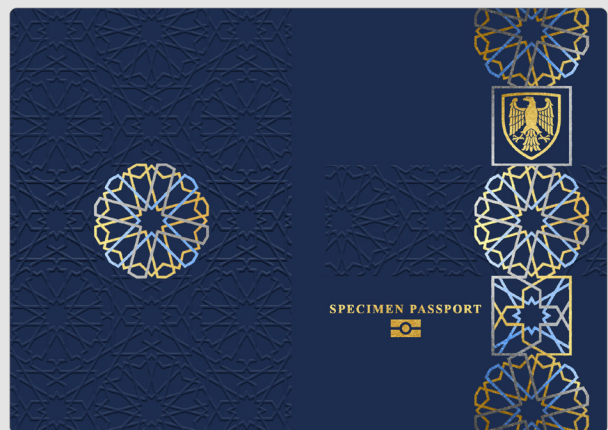

Cover-to-cover customization makes your country's passport uniquely reflect your heritage and symbolism, providing superior anti-counterfeiting protection.

#### Feature Highlights

- Multi-Color Foil
- Cover blind emboss
- Cover blind deboss
- UV Printing
- Front and back cover customisation
